Nature Of Work Undertaken

Generator Exhaust Stack Commissioning & Heat-Resistant Paint, Diesel Generator Exhaust Pipe & Thermal Insulation Cladding & DG Fabrication Shed

Busbar Trunking System -

Busbar trunking is an energy transmission and distribution system produced using copper or aluminium conductor options that make power distribution simpler and more flexible.

Solar panel power station

Installation of a facility that converts solar radiation, made up of light, heat, and ultraviolet radiation, into electricity suitable to be supplied to homes and industries.

VCB and DG KIOSK Shed Fabrication

A DG (Diesel Generator) Kiosk Shed is a protective enclosure designed to house diesel generators and associated equipment. The fabrication of these sheds involves constructing a robust structure. These Sheds often include features like ventilation systems, Sound Proofing & Access door for maintenance.

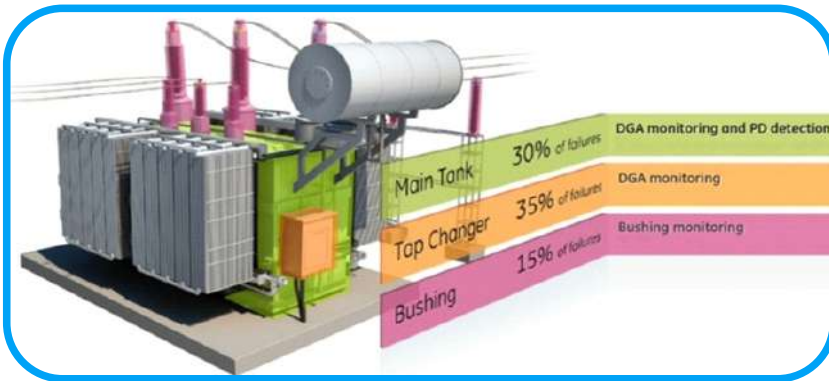

Oil Filtration Work Transformer

The Transformer Oil Filtration machine works on the principle of filter out the impurities through stage-wise filtration, water, dissolved gases, acetylene, hydrogen, and other gases through vacuum extraction and, acid removal through the ion exchange principle.

DGA TESTING

The DGA test analyzes the gas concentrations that are dissolved in the transformer oil. Small samples of oil are taken for this test, using a clean, moisture-free container/syringe. It is very important that a DGA sample is kept airtight.

Earthing testing

It is a test done to measure the resistance between a grounding electrode and earth.

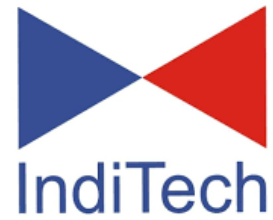

Street Light Pole & Led Light

LED street light is a lamp composed of a light-emitting diode (LED). And it will be installed on top of a pole that is used to provide light on roadways, sidewalks, parking areas, or other exterior areas. It's an Infrastructure construction unit in guarantees safety in the road, residential, or other exterior areas
